2012 Residential Recycling Report

This report documents the results of community recycling efforts in Cuyahoga County. The data was provided to the Solid Waste District by the communities. For each community, we report the tonnage of recyclables collected and the tonnage of organics collected. The combined tonnage was then used to calculate the community's recycling rate, which is shown as the percentage of waste the community diverted from landfills in 2012. The key below explains each column of data in the report.

Key

Tons Landfilled = the amount of residential waste the community landfilled in 2012. This includes waste collected through the community's waste collection program and from public buildings.

Tons Recycled (Recyclables) = the amount of recyclable materials collected through the community's curbside, drop-off, and public facility recycling programs. Recyclable materials include mixed paper, office paper, plastics, cans, glass, scrap metal, appliances, computers, household hazardous wastes and scrap tires.

Tons Recycled (Organics) = the amount of organic waste collected through the community's leaf collection, brush chipping and other programs.

Total 2012 Recycling Rate = the total percentage of the community's residential waste that was diverted from landfills through recycling and composting activities in 2012. This was calculated by dividing the Tons Recycled (recyclables + organics) by the total tons of waste generated (Tons Landfilled + Tons Recycled).

Total 2011 Recycling Rate = the total percentage of a community's residential waste that was diverted from landfills through recycling and composting activities in 2011 (provided for comparison purposes).

Printed on recycled paper

Community	2012 Tons Landfilled Solid Waste	2012 Tons Recycled Recyclables	2012 Tons Recycled Organics	2012 Total Recycling Rate	2011 Total Recycling Rate
