

2014 Residential Recycling Report

Key

Tons Landfilled = Solid waste collected through the community's waste collection program and taken to a landfill for disposal.

Tons Recycled (Recyclables) = Recyclables collected through the community's curbside and drop-off recycling programs. Recyclables include paper, cardboard, plastic, cans, glass, scrap metal, appliances, computers, household hazardous wastes and scrap tires.

Tons Recycled (Organics) = Organic waste collected through the community's yard waste collection programs. Organic waste includes leaves, grass and brush.

Total 2014 Recycling Rate = The percentage of the community's residential waste diverted from landfills through recycling and composting activities in 2014. The recycling rate is calculated by dividing the Tons Recycled by the total tons of waste generated (Tons Landfilled + Tons Recycled).

Total 2013 Recycling Rate = The total percentage of a community's residential waste that was diverted from landfills through recycling and composting activities in 2013 is provided for comparison purposes.

Materials recycled divided by solid waste generated (tons recycled + tons disposed) = % materials recycled

2014 Residential Recycling Report

The 2014 Residential Recycling Report has a new look! This year we chose to use a chart to show the percentage of each community's waste stream that is recycled and the percentage that is composted. The key below explains what each category represents. The Solid Waste District publishes this report annually to allow residents and public officials to see how they are doing and to meet Ohio EPA reporting requirements. Data is provided to the District directly from the communities. Corresponding numbers can be found on the reverse side of this report.

Thank you for your recycling efforts.

Key

% Recycled

The percentage of a community's total residential waste stream that is collected for recycling through curbside, drop-off and special waste recycling programs. Recyclables include paper, cardboard, plastic, cans, glass, scrap metal, appliances, electronics, and household hazardous wastes and scrap tires.

% Composted

The percentage of a community's total residential waste stream that is diverted from landfilling by chipping, mulching and composting programs. Yard waste/organics include leaves, grass, brush and wood waste.

Please Note

All percentages are rounded.
